Food For Thought

Should You Seek Sleep Help?

In this month's newsletter, we covered how you can get restful and restorative sleep. To be sure, getting sound sleep can be a big challenge for healthcare professionals. If you've tried several sleep strategies (like those mentioned in our newsletter article) but still struggle with sleep problems, you may have a sleep disorder that requires professional treatment. Consider scheduling a visit with your doctor if you regularly experience these symptoms:

- Persistent daytime sleepiness or fatigue
- Loud snoring accompanied by pauses in breathing
- Difficulty falling asleep or staying asleep
- Un-refreshing sleep
- Frequent morning headaches
- Crawling sensations in your legs or arms at night
- Inability to move while falling asleep or waking up
- Physically acting out dreams during sleep
- Falling asleep at inappropriate times (i.e., at work, driving)

Be yourself; everyone else is already taken.
—Oscar Wilde
